

# MATURING YOUR SECURITY.

**MANAGED INFORMATION SECURITY OFFICE (MISO)**

## Supporting you in building security maturity

The MISO service from Reliance acsn helps you to establish and maintain your organisation’s vision for information security strategy and maturity.

As well as providing oversight to security improvement activities, the service helps you to ensure your information assets and supporting technologies are adequately protected.

We work alongside your own designated stakeholders to deliver a truly collaborative approach in identifying, developing, implementing and maintaining processes across the enterprise to reduce information technology risks.

The MISO service also supports you in responding to incidents, establishing appropriate standards and controls, managing security technologies, and directing the establishment, implementation and management of robust security policies and procedures.

## WHAT WE DO TO SUPPORT YOU

- Develop, maintain and implement information security policies and standards
- Maintaining compliance with legal and regulatory requirements
- Monitor threats as well as risks to the organisation and facilitate the implementation of effective risk management processes
- Facilitate external and internal gap analysis against security frameworks and standards
- Incident response, and recovery
- Adopt a proactive approach to security management and security assurance coordination
- Ensure adequate documentation is in place to support policies as well as technical architectures and designs
- Third party security and supplier management

## OUR APPROACH

The MISO service is designed to be an extension of your own information security function, giving you access to a wide variety of both technical and consulting capabilities:

ASSESS

### Assess Existing Capability

Using our Cyber capability maturity framework, the Managed ISO function will assess current control capabilities and effectiveness, in-line with your business strategy & priority

DESIGN

### Develop Security Strategy and Roadmap

The Managed ISO function will work with key stakeholders to develop a security strategy aligned to organisations business goals and develop a security improvement roadmap with a prioritised set of activities

IMPROVE

### Implement Security Improvement Programmes

The Managed ISO function will oversee the implementation of security improvement programmes, effectively utilising resources and capabilities within the organisation; tied to clearly defined and measurable KPIs

### Effective Communication and Reporting

A customised set of reports will be developed by the Managed ISO function, with the right level of frequency and agreed format to ensure all stakeholders are supplied with relevant information in a timely fashion.

## ABOUT RELIANCE ACSN:

We are a Digital and Cybersecurity Service provider and we believe results come from a well-executed and business-integrated approach stemming from the application of our skills and expertise, combined with threat intelligence and effective risk management.

ACSN was founded in 2003. Reliance acsn was born through merger with Reliance Cyber Science in 2016.

We have a highly skilled and experienced team, with an ambitious plan underway to grow significantly in the near future.

We've built strong partnerships with over 80 customers across 5 continents, helping them to address Digital Transformation and Cybersecurity challenges.

Our staff are accredited by all the major security vendors and are able to support virtually any technology you have in place or you've been planning to procure.
